Advance Traveler Information for Rail

U.S. Customs and Border Protection (CBP) is proposing to require rail carriers to transmit advance electronic traveler information to CBP for any individual (crew and passengers) who is arriving in or departing from the United States on board a train. The rail carrier also would be required to transmit an advance notice of arrival or departure, as applicable, for the train. This rule would enhance security while facilitating legitimate international travel on board trains.

Agency: Homeland Security Department, U.S. Customs and Border Protection.

Document type: Proposed Rule.

Document number: 2026-20884.

Official Federal Register document. Matter furnished by the National Archives Federal Register API. Notice Nearby is not the publisher of record for this item.
