

Washington, D.C. building permits, September 27–October 3, 2026

Public notice. The District of Columbia building-permits layer for 2026 lists 169 permits with an issue date from September 27, 2026, through October 3, 2026.

The newest issue date on that layer is September 28, 2026. The count comes from the public DCRA feed map, layer named Building Permits - 2026.

Because the newest issue date is September 28, this layer does not show issue dates of October 1, October 2, or October 3. This notice does not list a street address, a permit number, or a fee.

It is a citywide count only. Confirm the permit on the District's own map before you rely on it.
