

Flash Flood Warning for Southeastern Baldwin County Until 4:15 p.m. CDT

Public paper · October 4, 2026 · Baldwin County, Alabama · Ryan Standley / Record of Sale, LLC / Notice Nearby

Heavy rain is causing flash flooding in southeastern Baldwin County, Alabama. The National Weather Service in Mobile issued an Immediate Flash Flood Warning at 1:10 p.m. CDT on Sunday, Oct. 4, 2026. It lasts until 4:15 p.m. CDT, which is 2:15 p.m. Pacific. Foley, Elberta, Summerdale, and nearby towns are named. Radar showed 2 to 3 inches already fallen, with 1 to 2 inches more possible. Do not drive through flooded roads. Turn around, don't drown.

Heavy rain is causing flash flooding in southeastern Baldwin County, Alabama. The National Weather Service in Mobile issued an Immediate Flash Flood Warning at 1:10 p.m. CDT on Sunday, Oct. 4, 2026. It lasts until 4:15 p.m. CDT, which is 2:15 p.m. Pacific. Foley, Elberta, Summerdale, Magnolia Springs, Miflin, Marlow, River Park, and Clay City are named. Radar showed thunderstorms with 2 to 3 inches already fallen and 1 to 2 inches more possible. Creeks, city streets, highways, underpasses, and low spots can flood. The warning covers southeastern Baldwin County, not every acre of the county.

What to do: do not drive through water on the road. Turn around, don't drown. Most flood deaths happen in vehicles. Six inches of moving water can knock a person down. A foot or two of moving water can float a car. You cannot tell the depth from the driver's seat. Stay off flooded underpasses and low spots until the warning ends. If you are in a low spot, move to higher ground. If you are trapped, call 911. If you can report flooding safely, tell local emergency services and ask them to pass the report to the National Weather Service. Do not treat 4:15 p.m. CDT as an all-clear until [weather.gov](https://www.weather.gov) says the warning is over.

The warning, in plain words

The sender is the National Weather Service office in Mobile. The headline says the warning was issued October 4 at 1:10 p.m. CDT and lasts until October 4 at 4:15 p.m. CDT.

Severity is Severe. Urgency is Immediate. Certainty is Likely. The message type is Alert. The status is Actual. The action on the VTEC line is new, not a continuation of an older warning. The VTEC string is /O.NEW.KMOB.FF.W.0040.261004T1810Z-261004T2115Z/. The World Meteorological Organization line is WGUS54 KMOB 041810.

The hazard line says flash flooding caused by thunderstorms. The source line says radar indicated. The detection parameter says radar indicated. The live text product does not print a damage-threat word such as Considerable.

The impact line names small creeks and streams, urban areas, highways, streets, underpasses, and other poor drainage and low-lying areas. Water can cover a road with no warning.

The county code on the alert is ALC003 for Baldwin County, Alabama. The SAME code is 001003. The alert id is urn:oid:2.49.0.1.840.0.05726ea3fff9f329176acb371c439b13c3ee8a01.001.1.

The Weather Service instruction is short: turn around, don't drown when you meet a flooded road. Most flood deaths happen in vehicles.

Which part of the county

This is not a warning for every acre of Baldwin County. The bulletin names southeastern Baldwin County, in southwestern Alabama.

Foley, Magnolia Springs, Summerdale, and Elberta sit in that southeastern part. Miflin, Marlow, River Park, and Clay City are on the same Weather Service list. The spelling Miflin is the spelling on the bulletin.

The rain line is on the official text. Between 2 and 3 inches have already fallen. Additional rainfall of 1 to 2 inches is possible in the warned area. That is the Weather Service figure, not a second clock.

This page names the county and communities only. It does not print a street address, a house number, or a numbered highway as a destination.

Places the warning names

The warning says some locations that will experience the flash flooding include Foley, Magnolia Springs, Summerdale, Elberta, Miflin, Marlow, River Park, and Clay City.

Foley, Elberta, and Summerdale are the cities the Mobile office named in its X post. Magnolia Springs, Miflin, Marlow, River Park, and Clay City are also on the weather.gov list. This page does not add towns the warning left out.

If your town is not on the list, you can still be in the warned area. The list is examples, not a fence. People north and west of this slice, including communities the bulletin does not name, are not inside this particular warning. Check weather.gov before you decide you are clear.

This page does not print a street address.

Notes
