

Montgomery County, Maryland permits, September 27–October 3, 2026

Public notice. Montgomery County, Maryland, publishes permits in more than one open file.

The electrical permits file lists 268 rows with an issued date from September 27, 2026, through October 3, 2026. All 268 list work type INSTALL.

The newest issued date in that file is October 1, 2026. Two other county files use an added date, not an issued date.

The residential permit file has 128 rows added in the same window. The commercial permit file has 37 rows added in that window.

The newest added date on each of those two files is October 1, 2026. This notice does not list a street address.

Do not add the three files into one issued-permit total. Check the county's copy.
