

New York place of performance: new prime contract awards

Public notice. USAspending lists new federal prime contract awards with a base transaction date from September 27, 2026, through October 3, 2026.

This notice uses award type codes A, B, C, and D only. Those codes are BPA calls, purchase orders, delivery orders, and definitive contracts.

Subawards are not included. For place of performance in New York, the award count on that filter was 4,370.

A place-of-performance geography report on the same filter, set to award spending, listed an aggregated amount of \$305,877,187.37 for New York. That dollar figure is the aggregated amount the geography report returned.

It is not a new total added for this notice. USAspending's awards last-updated stamp was September 30, 2026, so later October dates may not be in the file yet.

This notice does not list a street address or a vendor address. Confirm the rows on USAspending before you rely on them.
