

## **Salem structure permits, September 27–October 3, 2026**

Public notice. Salem's public structure-permit layer lists 9 permits with an issued date from September 27, 2026, through October 3, 2026. The newest issued date in that set is September 29, 2026. All 9 have status Issued. The layer does not publish a permit-type name, so this notice does not split the count by type. It does not list a street address or a permit number. The city's public file is a short rolling set, not a long archive. The count comes from Salem's open structure-permit service. Check the city's own copy before you rely on a permit.
