

Tigard permits, September 27–October 3, 2026

Public notice. Tigard's public permitting map lists 151 permits with an issue date from September 27, 2026, through October 3, 2026. The newest issue date in that set is October 2, 2026. The largest case types were public facility improvement (82), electrical (16), mechanical (16), plumbing (10), and residential (7). Those five groups are 131 of the 151. Closed permits can drop off this map, so the count is what the map shows now, not a full history. This notice does not list a street address or a case number. Check Tigard's own copy before you rely on a permit.
