

Texas place of performance: new prime contract awards

Public notice. USAspending lists new federal prime contract awards with a base transaction date from September 27, 2026, through October 3, 2026.

This notice uses award type codes A, B, C, and D only. Those codes are BPA calls, purchase orders, delivery orders, and definitive contracts.

Subawards are not included. For place of performance in Texas, the award count on that filter was 471.

A place-of-performance geography report on the same filter, set to award spending, listed an aggregated amount of \$992,515,402.74 for Texas. That dollar figure is the aggregated amount the geography report returned.

It is not a new total added for this notice. USAspending's awards last-updated stamp was September 30, 2026, so later October dates may not be in the file yet.

This notice does not list a street address or a vendor address. Confirm the rows on USAspending before you rely on them.
