

What a Clerk Is Already Required to Put in Front of the County

Public paper · Notice Nearby · 2026-09-23

Most of the paper a county already prints is not optional. A register may carry a second copy. A second copy is not the statute.

County clerks already post agendas, budgets, tax lists, and other instruments because a statute or local rule says so. Most of that paper is not optional marketing.

A public register may carry a second copy of a notice so a resident can search by county or district. The second copy helps access. It does not rewrite the duty the clerk already has.

Calling a second copy Legal Publication does not make it so. On Notice Nearby, paid new notices are Public Register Placement. Legal Publication is not for sale at checkout.

The honest sentence is short: the clerk's required posting is the duty; the register is a searchable shelf that may hold a copy.

Not legal advice. Not a newspaper. Not Legal Publication. Record of Sale, LLC (Oregon).
